Cohort Acronym

BCS70

Cohort type

General population-based cohort

Disease

Participant type

No diagnosis

Profile

Recruitment Period 01/04/1970

Sample size at start or planned sample size if still recruiting 9,841

Estimated Current Sample Size 5,000 to 9,999

Age at Recruitment 0

Gender Male and Female

Abstract

The 1970 British Cohort Study (BCS70) follows the lives of more than 17,000 people born in England, Scotland and Wales in a single week of 1970. Over the course of cohort members lives, the BCS70 has collected information on health, physical, educational and social development, and economic circumstances among other factors.
