

Biobank – CHU Angers

<https://neurodegenerationresearch.eu/survey/biobank-chu-angers/>

Name of bioresource/bank

Biobank – CHU Angers

Name of Principal Investigator

Title Professor

First name Annick

Last name Barthelaix

Address of institution where award is held

Institution Centre hospitalier Universitaire – IBS

Street Address 4 rue Larrey

City Angers

Postcode 49933

Country

France

Website

www.chu-angers.fr

Contact email (e.g. manager or coordinator)

AnBarthelaix@chu-angers.fr

Funding source

The University Hospital Center is a public health establishment; its activities are funded by the French Health Minister, the French Research minister and the Region Pays de la Loire

Q1 What conditions does your resource cover?

Alzheimer's disease and other dementias

Motor neurone diseases

Huntington's disease

Neurodegenerative disease in general

Q2a What DNA collection does your resources hold?

101-1000 donors

Q2b What cell lines does your resource hold?

1-50 distinct cell lines

Q2c What tissue (including post-mortem tissue) does your resource hold?

101-1000 donors

Q3 Are human tissues/samples/DNA from

Living donors: blood

Living donors: blood derivatives

Living donors: DNA

Living donors: skeletal muscle biopsy

Living donors: cerebro-spinal fluid

Post-mortem donors: brain

Post-mortem donors: spinal cord

Q4 Are tissues/samples/DNA from

Patients

Q5 Can samples be linked to clinical (phenotypic) information and if so, is this information:

Routinely collected as medical records

In a specific study-associated dataset

Collected as part of a specific clinical trial(s)

Q6 In what form are samples supplied?

Primary Samples: Stabilised samples (frozen or fixed)

Secondary samples:(derivatives of primary samples)

Secondary samples: plasma

Secondary samples: DNA

Secondary samples: RNA

Secondary samples: protein extracts

Secondary samples: cell lines derived from primary samples

Q7 Are biomarkers/analytes/biological characteristics already measured and the information available for your samples?

In most samples

Q8 What is the status of your tissue/sample/DNA collection?

Collection completed and available for use

Q9 What are the rules and procedures for access?

Apply to PI or co-ordinator at resource

Access independent of collaboration with PI

Access Committee mechanism

Local/ regional access

National access

International access

Access to industry

Access for pilot studies permitted

Access restricted to peer-reviewed work

Resource has own ethics approval so usually no need for separate external ethics approval
