## Principal Investigators

KU Leuven, Faculteit Geneeskunde, Dept Maatschappelijke Gezondheidszorg en Eerstelijnszorg, Interfacultair Centrum Biomedische Ethiek en Recht

## Institution

KU Leuven

## Contact information of lead PI Country

Belgium

## Title of project or programme

Biomarker based adaptive development in Alzheimer disease (BioAdaptAD)

## Source of funding information

Flanders Innovation & Entrepreneurship

## Total sum awarded (Euro)

€ 279,000

## Start date of award

01/06/2013

## Total duration of award in years

4.0

## The project/programme is most relevant to:

Alzheimer's disease & other dementias

## Keywords

Research Abstract

The general objectives of this project are to develop a BACE inhibitor for disease modification in Alzheimer's disease and to explore the development in an earlier prodromal Alzheimer's disease population. From a drug development perspective, this will involve multiple adaptation steps and the intensive use of biomarkers.
