Total sum awarded (Euro)

19924257

Start date of award

01-06-2008

Total duration of award in months

60

The project/programme is most relevant to

- Alzheimer's disease and other dementias
- Neurodegenerative disease in general

Keywords

Research abstract in English

The CENIT was launched in 2006 to stimulate private-public partnership in industrial research, through funding, by means of subsidies of up to 50%, large scale and major scientific-technical consortium projects aimed at planned research in future technology areas and with potential international projection, whose mission is to generate new knowledge that may be useful to create

new products, processes or services or to integrate strategic technologies. Consortia involving twenty four companies and thirty public research institutions. The following projects were funded through this initiative:

Methodology for the design, evaluation and validation of functional foods for the prevention of Alzheimer's Disease MIND – Multidisciplinary approach to Alzheimer's Disease

Solutions to accelerate the identification and development of novel drugs for the treatment of nervous system pathology
