Project/infrastructure description

CRMBM conducts translational research with the development and applications of MR methods and instruments to the morphologic, metabolic and functional exploration of animal models (rodents) and humans in order (i) to better characterize neurological, cardiovascular and muscular pathologies and (ii) to define new diagnostic and therapeutic strategies.

Date funding committed

01/01/2013

Date infrastructure operational

01/01/2014

Total capital cost (Euros)

Part of FLI (€14,000000 total)

Does the 'Total Capital Cost' include other associated costs?

Current infrastructure status

Operational
