

Design, synthesis and pharmacological evaluation of Multi-Target Directed Ligands as potential procognitive drugs in Alzheimer's disease treatment

<https://www.neurodegenerationresearch.eu/survey/design-synthesis-and-pharmacological-evaluation-of-multi-target-directed-ligands-as-potential-procognitive-drugs-in-alzheimer%c2%92s-disease-treatment/>

Principal Investigators

DALLEMAGNE Patrick

Institution

CNRS - Université de Caen Normandie

Contact information of lead PI

Country

France

Title of project or programme

Design, synthesis and pharmacological evaluation of Multi-Target Directed Ligands as potential procognitive drugs in Alzheimer's disease treatment

Source of funding information

Fondation Plan Alzheimer

Total sum awarded (Euro)

€ 100,000

Start date of award

xx/xx/2015

Total duration of award in years

2

Keywords

Research Abstract
