Name of Fellow

Dr Amy Brodtmann

Institution

Funder

NHMRC

Contact information of fellow

Country

Australia

Title of project/programme

Do strokes cause dementia?

Source of funding information

NHMRC

Total sum awarded (Euro)

€ 194,934

Start date of award

01/01/13

Total duration of award in years

5.0

The project/programme is most relevant to:

Alzheimer's disease & other dementias

Keywords

stroke | dementia | volumetric magnetic resonance imaging (mri) | cognition | neurodegeneration

Research Abstract

There is no direct evidence linking Alzheimer's Disease (AD) and stroke. It is unknown whether stroke can trigger progressive dementia in the same way as AD. In a group of stroke patients, I will measure MRI brain volume and cognition in the 5 years after stroke. These findings will be critical for identification of those patients most at risk of dementia after stroke. This may allow

future early intervention for these patients, via promising AD disease-modifying therapies.
