Title of project or programme

Etude longitudinale en imagerie multimodale de la maladie d'Alzheimer à un stade précoce : biomarqueurs de détection et de progression et mécanismes physiopathologiques. Longitudinal study in multimodal imaging of Alzheimer's disease at an early stage: biomarkers of detection and progression and physiopathological mechanisms.

Source of funding information

DGOS

Total sum awarded (Euro)

€ 1,221,000

Start date of award

xx/xx/2011

Total duration of award in years

5.0

The project/programme is most relevant to:

Alzheimer's disease & other dementias

Keywords
Research Abstract
Lay Summary
Further information available at:

Types:
Investments > €500k

Member States:
France

Diseases:
Alzheimer's disease & other dementias

Years:
2016

Database Categories:
