Title of project or programme

Evaluation des effets antalgiques de l'OXYcodone LP et de la L-Dopa, versus placebo, dans les DOuleurs neuropathiques centrales du patient PArkinsonien : Essai OXYDOPA. Evaluation of the analgesic effects of OXYcodone LP and L-Dopa, versus placebo, in the central neuropathic patients of the Parkinsonian patient: OXYDOPA trial

Source of funding information

DGOS

Total sum awarded (Euro)

€ 774,538

Start date of award

xx/xx/2013

Total duration of award in years

3.0

The project/programme is most relevant to:

Parkinson's disease & PD-related disorders

Keywords

Research Abstract

Lay Summary
