Follow.Me

## **Source of funding information**

Flanders Innovation & Entrepreneurship

## **Total sum awarded (Euro)**

€ 130,664

## **Start date of award**

01/06/2016

## **Total duration of award in years**

2

## **Keywords**

### **Research Abstract**

Follow.Me aims to satisfy people's desire to monitor the position of elderly people with different forms of dementia and Alzheimer, in order to prevent danger situations. Caregivers and family members will be able to track their patients and loved ones using geofencing technologies in order to know when they leave or enter a given area, the speed they are traveling, send them notifications that will appear on the watch and even call them. They will be able to create safe areas, unsafe areas and alarms when the Follow.Me device leaves a given location or when it arrives at a given place.
