## Further information available at:

With this loan, the EIB is providing long-term finance in support of the company's R&D investment, mainly focused on finding new applications for plasmatic proteins, including the treatment of Alzheimer's disease, vascular diseases, cardiovascular surgery and arterial thrombosis. The R&D activities financed will be carried out at existing centres in Europe up to the end of 2016. <http://www.eib.org/infocentre/press/releases/all/2015/2015-244-el-bei-firma-un-prestamo-de-100-millones-de-euros-con-grifols-en-el-marco-del-fondo-europeo-de-inversiones-estrategicas-efsi.htm>
