Purpose of resource

The "Information Analysis and Management" (IAM) node is a consortium of teams that will contribute to the construction of a network for data storage and information processing.

Q1. Is the resource?

Please Specify

Q2. Does the resource specifically provide for any of the neurodegenerative diseases/disease subtypes specified below?

Q3a. Is the resource accessible to the research community?

Q3b. If yes, what procedures and rules apply for access?

Q4a. What type of data is provided?

Please describe

Q4b. More generally are there other data available through the resource that you think may be useful to researchers in the context of the above conditions?

Please describe

Q5a. Is maintenance of this resource dependent on continued funding?

Q5b. If yes, when does the current funding period end?

Q5c. Are there plans to secure further funding beyond this period?

If YES please specify for how long in years

Q5d. What is the expected lifespan of the resource (in years)?

Q5e. Are there other plans affecting future use that it may be useful to know?

Types:

Bio/Neuroinformatic Resources

Member States:

France

Diseases:

N/A

Years:

2016
