Project/infrastructure description

Creatis is a biomedical imaging research laboratory, with about 200 persons, whose main areas of excellence and international influence are linked to two fundamental problems, namely: - Identification of major health issues that can be addressed by imaging - Identification of theoretical barriers in biomedical imaging related to signal and image processing, modelling and numerical simulation. Creatis meets these challenges through a multidisciplinary approach, based on a matrix organisation which stimulates interaction between six research teams working in information and communication science and technology, engineering sciences and life sciences.

Date funding committed

01/01/2013

Date infrastructure operational

01/01/2014

Total capital cost (Euros)

Part of FLI (€14,000000 total)

Does the 'Total Capital Cost' include other associated costs?

Current infrastructure status

Operational
