Name of Fellow

Dr JULIA GILMARTIN

Institution

Funder

NHMRC

Contact information of fellow

Country

Australia

Title of project/programme

Optimising medication use to maintain or improve quality of life in aged care facility residents with and without dementia

Source of funding information

NHMRC

Total sum awarded (Euro)

€ 410,650

Start date of award

01/01/16

Total duration of award in years

4.0

The project/programme is most relevant to:

Alzheimer's disease & other dementias

Keywords

dementia | medications | quality of life | aged care | residential care

Research Abstract

This research aims to explore and understand how medications impact on the quality of life of aged care facility residents with and without dementia. The outcomes of this research will guide health professionals as they improve how medications are used in this population, with the aim of maintaining or improving quality of life. This research will also explore how these outcomes can be successfully included in regular practice and widely used nationally and internationally.
