## **Name of Fellow**

Dr Edwin Tan

## **Institution**

## **Funder**

NHMRC

## **Contact information of fellow**

## **Country**

Australia

## **Title of project/programme**

Optimising the management of comorbidities in dementia: reducing disparities and improving clinical outcomes

## **Source of funding information**

NHMRC

## **Total sum awarded (Euro)**

€ 409,286

## **Start date of award**

01/01/16

## **Total duration of award in years**

4.0

## **The project/programme is most relevant to:**

Alzheimer's disease & other dementias

## **Keywords**

pharmacoepidemiology | geriatrics | dementia | dementia care | pharmacy

### **Research Abstract**

Many individuals with dementia also have other chronic medical conditions. This research will help us better understand the comorbidities experienced by people with dementia and the impact these have on clinical outcomes. This can lead to the development of consumer-centred management strategies. By ensuring the appropriate, equitable and timely treatment of comorbidities in people with dementia, there is potential to optimise the quality of life and health of people with dementia.

### **Types:**

Fellowships

### **Member States:**

Australia

### **Diseases:**

Alzheimer's disease & other dementias

### **Years:**

2016

### **Database Categories:**

N/A

### **Database Tags:**
