## Title of project or programme

RCUK Centre for Brain Ageing and Vitality

## Principal Investigators of project/programme grant

Title	Forname	Surname	Institution	Country
Professor Douglas	Turnbull		RCUK Centre for Brain Ageing and Vitality UK	

## Address of institution of lead PI

Institution RCUK Centre for Brain Ageing and Vitality  
Street Address Newcastle Biomedicine Campus for Ageing & Vitality, Newcastle University  
City Newcastle upon Tyne  
Postcode NE4 5PL

## Country

- United Kingdom

## Source of funding information

Medical Research Council

## Total sum awarded (Euro)

4939346.01

## Start date of award

01-10-2008

## Total duration of award in months

60

## The project/programme is most relevant to

- Neurodegenerative disease in general

## Keywords

## Research abstract in English

The centre will develop two main programmes to address the relationship between the healthy ageing brain and the healthy ageing body. The first programme will build on existing research strengths in age-associated neuronal loss and dysfunction, neurodegeneration and vascular disease and the second will extend current research on exercise, mobility, nutrition and other lifestyles factors that can influence vitality. By focusing on vitality, the centre will empathise the vast potential to deliver major

benefits to patients and the general public.
