

# Role of exosomes in the transmission of Alzheimer phenotype between neurons

<https://neurodegenerationresearch.eu/survey/role-of-exosomes-in-the-transmission-of-alzheimer-phenotype-between-neurons/>

## Principal Investigators

LAULAGNIER Karine

## Institution

Centre de recherche Grenoble Institut des Neurosciences – Grenoble

## Contact information of lead PI

### Country

France

## Title of project or programme

Role of exosomes in the transmission of Alzheimer phenotype between neurons

## Source of funding information

Fondation Plan Alzheimer

## Total sum awarded (Euro)

€ 308,454

## Start date of award

xx/xx/2011

## Total duration of award in years

5

## Keywords

### Research Abstract

### Further information available at:

## Types:

Investments < €500k

## Member States:

France

## Diseases:

N/A

**Years:**

2016
