

Development of a human embryonic and mesenchymal stem cell therapy for Parkinson's disease

<https://www.neurodegenerationresearch.eu/survey/title-of-pidevelopment-of-a-human-embryonic-and-mesenchymal-stem-cell-therapy-for-parkinsons-disease/>

Title of project or programme

Title of PI Development of a human embryonic and mesenchymal stem cell therapy for Parkinson's disease

Principal Investigators of project/programme grant

Title	Forename	Surname	Institution	Country
Professor Ernest	Arenas	Karolinska Institutet	Sweden	

Address of institution of lead PI

Institution Karolinska Institutet
Street Address
City Stockholm
Postcode 17177

Country

- Sweden

Source of funding information

Swedish Research Council

Total sum awarded (Euro)

668040

Start date of award

01-01-2009

Total duration of award in months

36

The project/programme is most relevant to

- Parkinson's disease

Keywords

Parkinson; ES cells; Mesenchymal stem cells; dopamine neurons; cell therapy

Research abstract in English

Lay summary

In which category does this research fall?

- Basic research
