

Function of Wnts in dopamine neuron development in vivo and in stem cells: Cell replacement strategies for Parkinson's disease

<https://www.neurodegenerationresearch.eu/survey/title-of-pifunction-of-wnts-in-dopamine-neuron-development-in-vivo-and-in-stem-cells-cell-replacement-strategies-for-parkinsons-disease/>

Title of project or programme

Title of PI Function of Wnts in dopamine neuron development in vivo and in stem cells: Cell replacement strategies for Parkinson's disease

Principal Investigators of project/programme grant

Title	Forname	Surname	Institution	Country
Professor Ernest	Arenas		Karolinska Institutet	Sweden

Address of institution of lead PI

Institution Karolinska Institutet
Street Address
City Stockholm
Postcode 17177

Country

- Sweden

Source of funding information

Swedish Research Council

Total sum awarded (Euro)

551133

Start date of award

01-01-2009

Total duration of award in months

36

The project/programme is most relevant to

- Parkinson's disease

Keywords

development; dopamine; Parkinsons disease; stem cell; wnt

Research abstract in English

In which category does this research fall?

- Basic research
