## Title of project or programme

Title of PI Improving functional gait and balance and predicting falls in elderly with an increased risk of falling using a progressive and specific training program – a randomized controlled study

## Principal Investigators of project/programme grant

Title	Forname	Surname	Institution	Country
Dr	Erika		Karolinska institutet	Sweden

## Address of institution of lead PI

Institution Karolinska institutet

Street Address

City Huddinge

Postcode 141 83

## Country

- Sweden

## Total sum awarded (Euro)

711240

## Start date of award

01-01-2011

## Total duration of award in months

48

## The project/programme is most relevant to

- Parkinson's disease

## Keywords

Research abstract in English

Lay summary

In which category does this research fall?

- Clinical research

### **Source of funding information**

Swedish Research Council
