

# Norwegian Molecular Imaging Consortium

<https://neurodegenerationresearch.eu/survey/title-of-pinorwegian-molecular-imaging-consortium/>

## Name of RN

Title of PI Norwegian Molecular Imaging Consortium

## Mission of RN

NorMIC consists of the following partners: UiB, NTNU, UiS, UiO and UiT. NorMIC focuses on cell and tissue imaging and collaborates closely with the whole animal molecular imaging network. The aims of NorMIC include creating an imaging network to improve communication among scientists and to spread the technology more efficiently, serving regional scientists, giving national and international yearly courses and further developing state-of-the-art technologies.

## Director

Title Five national nodes at the five Norwegian universities

First Name

Last Name

## Address of central coordination point for the network

Institutions

Street Address

City

Postcode

## Country in which RN operates

- Norway

## Date the RN was established

01-01-2003

## The RN has specific relevance to these neurodegenerative diseases:

- Neurodegenerative disease in general

## Funding source

The Research Council of Norway and others

## Start date for current core funding

01-01-2003
